

Liste des marchés acceptés par Keytrade Bank Luxembourg en couverture des crédits Lombards.

Dans le but de s'assurer une couverture adéquate en garantie de votre crédit Lombard et conformément aux Conditions d'ouverture du crédit Lombard, Keytrade Bank Luxembourg a établi une liste des marchés règlementés ou considérés comme « équivalent règlementés ». La banque s'appuiera sur cette liste pour la valorisation de votre portefeuille dans l'optique du calcul de la marge de couverture de votre crédit.

Dès lors, la valeur de tous les titres cotés sur les marchés considérés comme non-règlementés d'après cette liste sera considéré comme étant égale à 0, pour les besoins du calcul de couverture.

Vous trouverez dans le tableau ci-dessous, la liste des marchés règlementés ou considérés comme « équivalent règlementés » par Keytrade Bank Luxembourg.

Cette liste comprend l'ensemble des marchés mondiaux. Dans la première colonne, les MIC (Market Identifier Code) des différents marchés. Dans la deuxième colonne, la description du MIC, dans la troisième colonne : le pays dans lequel le marché est organisé. Dans la dernière colonne se trouve la variable Regulated Market ; celle-ci est une variable binaire : elle vaut 1 lorsque le marché est règlementé et prend la valeur 0 lorsque le marché est non-règlementé.

En fonction de la proportion des titres cotés sur des marchés règlementés, « équivalent règlementés » ou non règlementés que vous détenez dans votre portefeuille, cette liste vous permettra de faire les arbitrages nécessaires en vue d'avoir un pourcentage de couverture de votre crédit lombard au-dessus du seuil fixé dans votre contrat.

En outre, nous vous faisons remarquer que certains titres cotés sur les marchés ARCX, XFRA et XSWX, malgré qu'ils soient considérés comme « non équivalent règlementés », sont « acceptés » par la banque et pris en compte dans le calcul de marge. La banque se base sur une liste spécifique (une « Black and White List ») qu'elle a établie répertoriant tous les instruments cotés sur ces 3 marchés et qui sont « acceptés » pour le calcul de la couverture. Voir PDF : "ARCX Black and White List"; "XFRA Black and White List"; "XSWX Black and White List".
